Florida State Statute 119.07 provides that if the nature or volume of public records being requested for inspection, examination or duplication is such as to require extensive use of information technology resources or extensive clerical or supervisory assistance by City personnel, in addition to the actual cost of duplication, a special service charge may be imposed. Under the City's current policy, extensive time is defined as more than 15 minutes. As such, if compiling the documents for a public records request will require more than 15 minutes of a staff member's time, the City of Eustis will charge an additional fee equal to the staff member's hourly rate for the time required to complete the request (less 15 minutes). The fee will be based only on the staff member's hourly rate and will not include the City's cost for benefits. For any requests that are estimated to cost more than \$100, the City will require a 25% deposit prior to the records being compiled. For all records requests, any fees required must be paid prior to receipt of the documents. If any individual or organization makes a records request and then fails to pay the appropriate fees once the requested documents have been compiled, that individual or organization will be required to prepay an estimated cost for any future requests before the documents will be compiled, as well as pay for the original request.
