Excerpted from the City's Comp. Plan:**Mixed Commercial / Residential (MCR):**

This land use designation is intended to regulate the character & scale of commercial uses so as to minimize their impacts on adjacent roadways & to promote their compatibility with adjacent or nearby residential uses.

General Range of Uses: This category accommodates a mix of residential, commercial, office, institutional, & schools. Public & utility services that are 5 acres or less in size are also permitted.

Maximum Density: Residential densities may not exceed 12 dwelling units per net buildable acre.

Intensity Range: up to 2.5 FAR subject to restrictions in Section 109-3 of the Land Development Regulations.

Mix Requirements: There are proportional requirements & limitations regarding the amount of residential & non-residential uses allowable in an area designated MCR. For the mixed land use category MCR, the City establishes, & shall monitor on a citywide basis, a mix of uses as follows:

Residential: 15% - 25% of total MCR acreage
Commercial/Office: 75%-85% of total MCR acreage

The composition of mix for each proposed development will be determined on a case-by-case basis during the development review process. Specific uses permitted will be monitored by the City to ensure continuity & compatibility with adjacent Land uses. Individual properties may develop residentially or commercially, provided that all applicable criteria set forth herein are met.

Special Provisions:

(1) Future amendments to designate areas as MCR shall be permitted only along arterial & collector roads & in certain neighborhoods which meet the following conditions:

a. Where the arterial road frontage is generally undeveloped, residential development may be feasible & will be encouraged;

b. Strip commercial development shall be minimized, including actions that would extend or expand existing strip development;

c. The arterial road frontage contains an existing mix of viable commercial & residential uses;

d. The clustering of viable commercial businesses within or adjacent to residential neighborhoods is determined to not have a detrimental visual or operational impact on such adjacent or nearby residential uses;

(2) **Developments within the Wekiva Protection Overlay** that include longleaf pine, sand hill, sand pine, & xeric oak communities shall protect these areas as dedicated open space or conservation easements, with total open space equal to at least 35% of the net buildable area.

From the Sec. 110-5 of the LDRs:

All accessory uses and structures shall obtain a building permit or other permit or license.

Mixed use district accessory use/structure. Customary accessory uses/structures may include, but are not limited to the following: swimming pools, spas/hot tubs, tennis courts, fences, utility/storage buildings, greenhouses, gardens, garages, satellite dishes/antennas, boathouses, docks, catwalks, and elevated walkways.
