Excerpted from the City's Comp. Plan:**Residential/Office Transitional (RT):**

This land use designation applies to older residential areas having residential character, which are located adjacent to non-residential development. The purpose is to provide for establishment of business & professional offices & limited retail & service businesses while maintaining residential character or compatibility. The concept is that many older residences are impacted by traffic or adjacent non-residential uses & are no longer economically viable as dwellings. Allowance of limited commercial use is a means of making these areas more productive while maintaining a residential-type character.

General Range of Uses: This category accommodates residential uses; professional & business offices in certain predominantly residential areas near major traffic arteries & adjacent to commercial areas; outdoor recreation; & schools. Public & utility services & facilities that are 2 acres or less in size are also permitted.

Maximum Density: Residential densities may not exceed 12 dwelling units per net buildable acre.

Intensity Range: up to 2.5 FAR subject to restrictions in Section 109-3 of the Land Development Regulations.

Mix Requirements: There are proportional requirements or limitations regarding the amount of residential & non-residential uses allowable in an area designated RT on the Future Land Use Map. For the mixed Land use category RT, the city establishes, & shall monitor on a citywide basis, a mix of uses as follows:

Residential: 55% - 70% of total RT acreage
Commercial/Office: 30%-45% of total RT acreage

The composition of mix for each proposed development will be determined on a case-by-case basis during the development review process. Specific uses permitted will be monitored by the city to ensure continuity & compatibility with adjacent Land uses. Individual properties may develop residentially or commercially, provided that all applicable criteria set forth herein are met.

Special Provisions:

(1) Future amendments to designate areas as RT shall be required to be designated near thoroughfares & commercial areas to allow for limited transitional commercial uses in recognition that these areas are impacted by adjacent commercial use & to provide an economic use of property while maintaining their general residential character by:

- a. limiting commercial uses to retail, business & professional offices, group homes, & home occupations as defined in the Land Development Regulations (LDRs);
- b. limiting external lighting & signs to that which would normally be permitted in adjacent residential zoning districts;
- c. screening any permitted non-residential use from abutting residential properties by a landscape buffer, in accordance with City requirements;

(2) **Developments within the Wekiva Protection Overlay** that include longleaf pine, s& hill, s& pine, & xeric oak communities shall protect these areas as dedicated open space or conservation easements, with total open space equal to at least 35% of the net buildable area.

From the Sec. 110-5 of the LDRs:

All accessory uses and structures shall obtain a building permit or other permit or license.

Mixed use district accessory use/structure. Customary accessory uses/structures may include, but are not limited to the following: swimming pools, spas/hot tubs, tennis courts, fences, utility/storage buildings, greenhouses, gardens, garages, satellite dishes/antennas, boathouses, docks, catwalks, and elevated walkways.
